

CVFS-SCAN – Biomarker Pilot Summary

Past

- Completed data collection:
 - August 2023
 - venous blood (N=27, 59%)
 - 10 ml EDTA; 20 ml SST
- How many waves of data: pilot

Present

- What biomarkers are you collecting currently? N/A
- What assays are you measuring? N/A

Future

- next wave of data collection:
 - 2025: baseline wave, about to get started
- Any modifications from prior waves?
 - none currently contemplated
- Any new measures?
 - none currently contemplated
