

# Indonesia Family Life Survey (IFLS) - Biomarker Update

## Past

- What have you collected in the past?
  - Physical measures
  - Blood drops
  - Dried blood spots (DBS)
- How many waves of data collection have you conducted
  - Total of 5 waves
  - Two waves with DBS collection

## Present

- What biomarkers are you collecting currently?
  - Physical measures since wave 1
  - Point of care device measurement of hemoglobin since wave 2
  - DBS-based measurement of CRP and HbA1c for waves 4 & 5

## Future

- Proposal for IFLS wave 6 was submitted in March of 2025
- Repeat of biomarkers obtained during waves 4 & 5
- Plan to add DBS-based measurements of neurofilament light (NfL) and glial fibrillary acidic protein (GFAP), using Meso Scale Discovery (MSD) platform
